What's New in Integrity Controls Environment (ICE) 15.0 P6 Release

In this Release we have made PAGENT part of the Component Inspectors under the
W WorkView .. - Image Focus Workbench Views Selection.

We have removed the ACF2 and Top Secret checks from IPLCheck.

We have changed the name of the NEZ_RACF_INSPECTION to NEZ_SETROPTS_INSPECTION.

Case #1863 - IFO - OPSYS - Corrected for ABEND U1101 when no space available for new journal.

Case #2019 - IFO - OPSYS - Added a check for STEPLIB being unauthorized due to one of the libraries being unauthorized.

Case #2093 - IFO - OPSYS - Added option to allow filtering of IFO0441E & IFO0909E messages within NSEMSGxx.

Case #2099 - IFO - OPSYS - Improved recovery options when IFOM is unable to obtain Note Pad lock.

Case #2105 - IFO - OPSYS - Removed erroneous debug messages from NSWJNPU.

Case #2106 - IFO - IPLCHECK - Corrected for Health Checker inspection error messages in IPLCheck.

Case #2107 - IFO - IPLCHECK - Corrected for false alert for NEZ_TSS_INSPECTION.

Case #2109 - IFO - OPSYS - Added support to allow quoted strings in some IZUPRMxx string values.

Case #2111 - IFO - IFOR - Corrected for ABEND800 when logging onto IFOR.

Case #2112 - IFO - TCP/IP - Added check for erroneous commas that may cause IPL failure.

Case #2114 - IFO - OPSYS - Corrected IZUPRM00 Member Coding Issue.

Case #2115 - IFO - OPSYS - Corrected issue with TRAPS parameter in DIAGxx Member.
