

What's New in Integrity Controls Environment (ICE) 15P6A

In this Release we have made PAGENT part of the Component Inspectors under the W WorkView .. - Image Focus Workbench Views Selection.

We have removed the ACF2 and Top Secret checks from IPLCheck.
We have changed the name of the NEZ_RACF_INSPECTION to NEZ_SETROPTS_INSPECTION.

Added a check for STEPLIB being unauthorized due to one of the libraries being unauthorized.
A new message S047 is now generated. See the attached documentation P47 Stops S047.pdf

IFO - OPSYS - Corrected a TCPIP User Abend that was introduced with IFO 15.0 P6.

IFO - TCE - Corrected a TCE Issue that may create false compares.
