NewEra Software Announces Support for JES3^{plus} from Phoenix Software

Morgan Hill, California – NewEra Software, Inc. announced that it will provide support for JES3^{plus} from Phoenix Software. NewEra's Image FOCUS will work with JES3^{plus} as part of its JES3 Inspection Process.

"It was a pleasure to work with Phoenix Software so we could provide support for their great new product," Gordon Daniel, Director of Software Development for NewEra said.

Ed Jaffe, Chief Technology Officer for Phoenix Software International said, "I've been impressed by NewEra's developers and their products for many years. We are certain that our partnership will greatly benefit the JES3 community as they transition to JES3^{plus} while continuing to leverage NewEra's products with confidence."

Installations interested in learning more can send an email to support@newera.com to get additional information.

###

NewEra Software, Inc. was founded in 1990 with the specific goal of developing, marketing and supporting innovative system management tools and services. Thanks to the continued support of thousands of systems professionals worldwide that have come to depend on NewEra, the company has become an industry leader and its products the industry standard for repair, recovery, data erasure and integrity of large systems.

NewEra is the proud sponsor of The z Exchange, an online user group featuring webcasts from industry experts and other relevant information on all things z. <http://www.newera-info.com/The-z-Exchange.html>
