## What's New in Integrity Controls Environment (ICE) 17.0 P11 Released 05/23/23

With our last release ICE 17.0 P10 we inadvertently introduced 2 issues that are corrected with this ICE 17.0 P11 Release.

If you wish to Install ICEDirect - This will have to be a complete new full installation if you haven't installed at least ICE 17.0 P4 as of yet and cannot be completed by installing the PTF.

If you have downloaded and installed using SMP/e, we have also made a PTF available for this release as well. If upgrading using the SMP/e, please follow the attached pdf document to do your installation. The document is called: SMP-applying\_a\_PTF.pdf. In the SMP-e pdf it shows you can either download the PTF from your customer download links or from our secure website. Please review the attached documentation and let us know if you have any questions.

## 1 - ICEDirect Getting Started Guide -

https://www.newera.com/INFO/ICE DIRECT GETTING STARTED.pdf

ICEDirect Support - \*\*\* Is now included with all releases starting with ICE 17.0 P4 \*\*\* All Customers wishing to download this release that contains the Web Server will have to do a completely new install if you haven't downloaded and installed at least ICE 17.0 P4. Please see below what is required for installation of this release.

Case #2406 - IFO - TCPIP - Corrected an Issue that was introduced with ICE 17.0 P10 release with SAY messages coming out when running a TCPIIP Workbench inspection.

Case #2407 - IFO - OPSYS - Added support for BPXPRMxx Member for TFS Filesystem Error. This was introduced with ICE 17.0 P10.

IFO - OPSYS - Corrected an Issue with IGDSMSxx Member receiving an Invalid SUBPARM for IGD17002I Message.

Installing ICEDirect -This will have to be a complete new full installation if you haven't downloaded and installed at least ICE 17.0 P4 yet.

ICEDirect is a collection of application interfaces that provide access to the Integrity Controls Environment through the internet using a browser-based interface, The Web Edition. This is an SMP Installation and for ICEDirect it will be required to do a new full download and installation. After downloading the DISKET File you will run the INSTALL Job and then run the following jobs inside of the IFOHLQ.INSTLIB.

ICE Datasets: \$SM10AL1 \$SM10AL2 \$SM10AL3 \$SM10BLD \$SM20CSI \$SM30INI \$SM40DDF \$SM50REC \$SM60APL \$SM70ACC Web Server Datasets: \$SM80AL1 \$SM80BLD \$SM80DDF \$SM80REC \$SM82APL \$SM82CPY \$SM84ACC

Then you will have to supply <a href="mailto:support@newera.com">support@newera.com</a> with a D M=CPU as ICEDirect will require a new set of License Keys.

After running all the above jobs, you will update the Member NEZWEB00 in the IFOHLQ.PARMLIB Dataset with the information needed.

At this time support will generate the license keys and contact you for an installation Zoom/Webcast to complete the steps necessary to finish this installation.
